## SUMMARY

Software Engineering graduate with 1+ year of hands-on experience in Unity game development and production management. Skilled in C#, UI/UX development, gameplay programming, JSON data persistence, 3D environment design, and cross-functional production. Experienced in bridging programming, art, and production workflows while delivering game projects and representing projects at industry events.

---

## EXPERIENCE

### Software Developer (Unity)

Aug 2025 - Present

Aiqona Productions, Online

- UI/UX Development: Develop modular menus and user-friendly interfaces to ensure smooth user experiences.
- Technical Integration: Act as the main bridge connecting programming pipelines with 3D art design using Unity and Autodesk Maya.
- Data Management: Engineer robust JSON-based data persistence architectures and develop software solutions to overcome technical obstacles.

### Production Manager

Aug 2025 - Present

Aiqona Productions, Online

- Serve as the primary project manager, managing and aligning multiple studio departments (Programming, Art, Marketing, and Finance) to ensure cohesive operations.
- Manage the end-to-end production lifecycle of the "Out to Deliver" project, overseeing task allocation and production milestones to meet strict deadlines.
- Officially represent the studio at major industry events, including the Indie Games Day exhibition, to pitch projects, build relationships, and interact directly with audiences and stakeholders.

### 3D Environment & Concept Designer

Jan 2021 - Dec 2022

Freelance / Self-Employed, Online

- Created custom 3D environments, interior designs, and visual assets tailored to client specifications and creative briefs.
- Partnered with clients to translate abstract ideas and early concepts into fully realized 3D visualizations and interactive layouts.
- Delivered high-quality concept art and game-ready 3D environmental assets on tight schedules while managing end-to-end client communication.

---

## INTERNSHIP

### Operations & Development Intern

Jan 2025 - Aug 2025

WNDR Group, Riyadh

- Contributed to the development of interactive systems and implemented bug fixes within a fast-paced team environment.
- Assisted in designing and programming Artificial Intelligence (AI) behaviors and integrated UI features.

---

## PROJECTS

**Pizza Knight: Out To Deliver**

Aug 2025 - Present

Project manager / Game developer / 3d art

- Led the end-to-end production and technical development of a fast-paced rogue-lite action game in Unity.
- Engineered core gameplay mechanics, custom UI architectures, and robust JSON data persistence systems.
- Coordinated cross-functional workflows across programming, 3D art (Autodesk Maya), and game design to hit milestone deadlines.
- Showcased playable builds and pitched the title to industry publishers and stakeholders at major international events (Indie Games Day, gamescom).

**While He Seeks**

Mar 2025 - Aug 2025

Game designer / Game developer

- Developed a fully integrated multiplayer interactive system

**Sari Game**

Jan 2025 - Feb 2025

Game designer / Game developer

- Executed full-cycle in-house development including 3D modeling and environment design

**The Cave**

Sep 2022 - Oct 2022

3d Artist

- Designed and built a complete 3D digital asset ready for deployment

---

**EDUCATION**

**Bachelor of Software Engineering**

Aug 2020 - Aug 2025

University of Hail, Saudi arabia,Hail

GPA 3.4/4

**Game Development Bootcamp**

May 2020 - Sep 2020

Vertex School, Online

Successfully completed an intensive 17-week Game Development Bootcamp organized by the Saudi Digital Academy (SDA) in collaboration with Vertex School.
