🔗 More About me

📄 SUMMARY

Software Engineer, 3D Artist, and Full-Cycle Game Producer with a proven track record of managing development from early prototyping to successful Steam releases. Specialized in Unity (C#) programming, technical art integration, and cross-functional team leadership. Passionate about delivering polished, performant gameplay experiences by seamlessly bridging the gap between core programming and 3D art pipelines.

🎓 EDUCATION

Bachelor of Software Engineering

2020 – 2025

University of Hail

- Graduated at 8/2025
- Overall GPA: 3.4/4

Game development Bootcamp

2020/05 – 2020/09

SDA & Vertex school [🔗](#)

Online

Specialized camp at Vertex School focused on 3D game art. Learned key skills like 3D modeling and texturing to create immersive environments, gaining insight into how 3D art improves gameplay and storytelling.

👛 PROFESSIONAL EXPERIENCE

Game Producer

2025/08 – Present

Aiqona Productions [🔗](#)

Saudi Arabia,Riyadh

- Act as the primary project coordinator, managing and aligning all studio departments—including programming, art, marketing, and finance—to ensure cohesive and efficient development.
- Managed the end-to-end production lifecycle of the medieval-themed rogue-lite driving shooter, *Out to Deliver*, guiding the project from its early prototyping phases to its Steam release build.
- Oversaw task allocation, scheduled production milestones, and managed a multidisciplinary team of specialists to maintain steady progress and meet project deadlines.
- Represented the studio at major industry events, including the Indie Games Day exhibition (May 2026), to showcase projects, pitch to stakeholders, and network with players and content creators.

Game Dev intern

2025/01 – 2025/08

WNDR group [🔗](#)

Riyadh

- Developed gameplay systems and UI features using Unity and C#.
- Designed and implemented enemy AI using NavMesh.
- Built a multiplayer system integrated with Steam API.
- Contributed to ideation, prototyping, and bug fixing in a team setting.

Unity developer

Aiqona Productions

2025/08 – Present
Saudi Arabia,Riyadh

- **UI/UX Programming:** Developed modular menus and standardized C# UI scripts for *Out to Deliver*.
- **Technical Art Integration:** Bridged programming and 3D art pipelines using Unity, Autodesk Maya, and Substance Painter.
- **Input Optimization:** Migrated core input systems, utilizing safeguarded Update loops for precise and reliable control.
- **Data Persistence:** Engineered robust JSON-based save/load architectures to manage player data and game states.
- **Scene Management:** Created asynchronous loading systems and persistent data patterns for seamless scene transitions.
- **Game Analytics:** Integrated telemetry tracking tools to monitor player behavior and balance gameplay mechanics.

 SKILLS

Maya		Problem solving	
Substance painter		Communication skills	
Team-work		Git & Git hub	
Unity Engine		C#	

 PROJECTS

While He seeks game

2025/03 – 2025/06

Developed a multiplayer game using Unity with FishNet networking, fully integrated with Steam

the cave

- the cave is game ready asset designed for game that never seen the light for me the cave is the best artpices I made and I'm really proud of it.

Sari game

Developed with Unity everything was created in-house, including sprite design and 3D modeling.
